

product data sheet

Steplift - SB Range

The Wessex Step Lift SB800 Range has been developed as a relatively low cost option to give wheelchair users easy access where difficulties exist due to a change in level or the presence of steps.

The lift is compact whilst offering a large platform area and shallow ramp for easy access. The range offers through and side access platforms, with bridging available as an option on the through access model.

All models are finished in Stainless Steel with Aluminium Platform and Ramps as standard.
